1 Place ankle at 90 degrees.

Clean skin with soap and water

Apply at least 30 minutes prior to activity

Clip hair to 1 cm or less (if needed)

Stretch the skin to be taped

Do not stretch the ends of the tape

Rub entire application well after applying each strip

2 Anchor middle portion of full-strip with 50% stretch under heel.

3 Lay each end down with no stretch over the sides of the foot.

4 Anchor middle portion of full-strip with 50% stretch around back of heel.

5 Lay each end down with no stretch over the sides of the ankle.

6 Anchor full-strip on back of leg with enough length to reach heel.

7 Apply 50% stretch along the Achilles tendon and bottom of heel.

8 Press edges of tape around tendon and onto skin.

9 Lay end down with no stretch.

10 Rub application well to securely fix all edges to skin.
